DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 3, line 4, the recitation "the flange" lacks positive antecedent basis in the claim.

Lines 4-5 appear to be inaccurate and/or misdescriptive. From the wording, it appears that the "J" lock engages the flange, a worm drive, a worm gear and a bolt. Is this what applicant means?

With respect to claim 7, line 3, "said circular key stem adaptor" and "said polygonal key stem" lack positive antecedent basis in the claims. On line 4, "said circular lock" lacks positive antecedent basis in the claims. On line 5, "said holes" lacks positive antecedent basis. On line 6, "said pin" lacks positive antecedent basis. It appears that this claim should depend from claim 5 instead of claim 4.

With respect to claim 8, line 5, "said strap" lacks positive antecedent basis in the claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

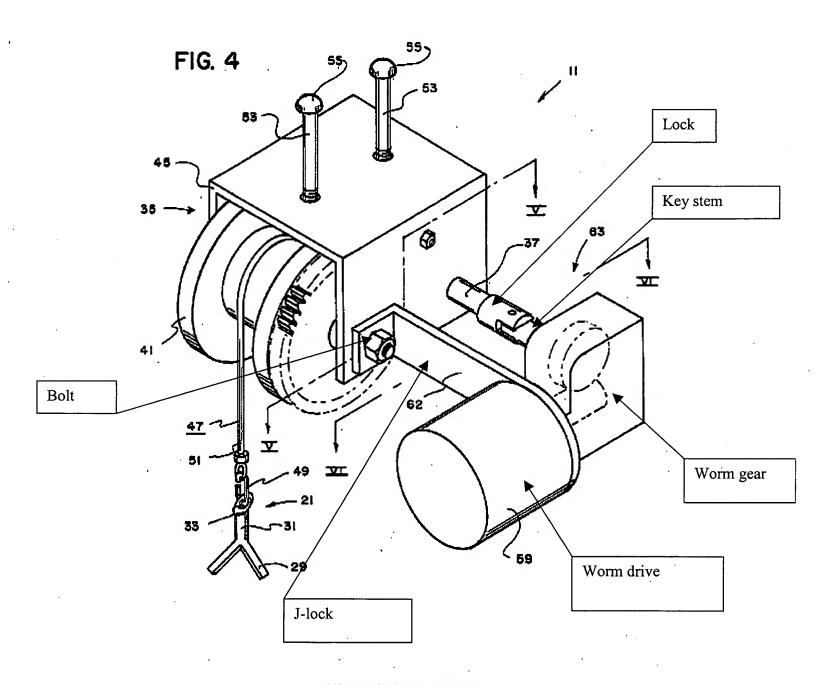

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3, 4 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent no. 4,613,273 to Wagner.

Wagner, in Figure 4, discloses the elements of the claims as shown below.

With respect to claim 8, the method described in this claim would inherently result from the use of the apparatus of Wagner.

Art Unit: 3654

Allowable Subject Matter

Claim 1 is allowed over the prior art of record.

Art Unit: 3654

Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed September 19, 2005 have been fully considered but they are not persuasive.

In response to applicant's remarks on the second full paragraph of page 5 of the reply regarding the claim 3, there is no claim language indicating that the J-lock is a "temporary retaining structure". Even if there was language to that effect, Wagner shows the J-lock (62) to be detachably attached to the flange via a nut and bolt. Applicant points out that the key stem is "frictionally engaged" to the lock but no language to that effect is set forth. The language sets forth that the key stem is "configured and sized to *interface* with a lock" which is clearly shown in Wagner, i.e. the stem interfaced with the lock (as shown in the figure above).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Emmanuel M Marcelo whose telephone number is 571-272-6949. The examiner can normally be reached on Monday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Katherine Matecki can be reached on 571-272-6951. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
